Litmus Learn

The Next Step in Blended Learning

Problem

Current EdTech tools

Does one thing

Siloes student performance data

Teachers have to re-create content, manage many logins

Do not integrate with one another

Aggregate costs to districts

Solution

Litmus Learn

Does many things well

Analyzes student performance data across contexts

Allows content to be created once, used across all features

Deeper insights across all features, fostering engagement

Single line item cost

Solution

Litmus Learn offers what no other platform can -

A single, dynamic, integrated platform that is intuitive to use, and deeply effective in streamlining content creation and student learning.

Direct impact on teachers: Reduce stress, less overwhelming task of writing lessons, assessing learning, and engaging students

Direct impact on students: Use quality content and AI insights to personalize learning, deepen engagement, and encourage social learning as an integral part of the classroom experience

Litmus Learn upgrades the student/teacher relationship.

Our **Confidence Assessment** lets teachers know how students feel about the material

Teachers gain insight into students' **learning styles** and **content mastery** across features

AI helps teachers **write lesson plans** faster, better

AI-assisted grading of student work

The social doc helps students **support one another**

Our **AI tutor** walks students through difficult tasks

Gamification, interactive videos, digital flashcards, simulations, and formative assessments deeply **engage students**
